

Peace of Mind

The health and safety of your family and ours, is top priority!

Clean boats have always been important to us, but at this moment in time, we know boat cleanliness is even more critical.

That's why we have modified our cleaning procedures using recommendations from the CDC.

On top of vacuuming and general wipe-down cleaning, while wearing 1 time use rubber gloves, we are disinfecting key areas like the following:

- Key & Ignition
- Throttle
- Cupholders & Compartments
- Seat surfaces & Pockets
- Areas between seat/console & seat/doorways
- Dashboard
- Instrument panels
- Steering wheel & column
- Accessory panel
- Door interiors & pockets
- Door Handles (interior & exterior)
- Mirrors
- Any other high touch areas
- And any Tube, ski or other packages that we rent

Each rental boat is safety checked weekly for top running performance and Coast Guard Compliance. This is a multi-point inspection that also includes a water test!

If you would like to "clean like the pros" the products we use are marine grade and eco-friendly, and are available for purchase in our Pro Shop.

There is no better place to "Social Distance" than on a boat
